

Mobile Applications (mAPPs)

Inspections and checking for compliance with standards is an ongoing job at every hotel, every day.

Now our mobile applications (mAPPs) allow hotel staff to conduct many ongoing routine operations faster and easier in real time — without paper reports — so properties can operate more productively and more profitably.

These new proprietary software programs from VSi are specially-designed for installation on a smart phone, tablet, or mobile device:

- **v-Inspect-GR** — transforms the guest room inspection process
- **v-Inspect-PA** — transforms the public area inspection process
- **v-Repair** — real-time engineering ticket application
- **v-Prop** — examine and manage assets at a property level
- **v-Ops** — multiple applications in a single package

YOU Have Questions. WE Have Answers!

Mobile Applications (mAPPs)

Features

Comprehensive “turnkey” solution includes:

- Proprietary “Rapid Application Development” process that customizes any inspection form or report template for any specific brand or property
- Application-unique software that’s easy to implement and easy to use
- Real-time management reports provide data that is secure, cloud-based, and facilitates decision-making
- Tools for both employee feedback and task tracking that confirm and quantify what work was done, when, how, and by whom, with information tagged to photographs, if desired
- No upfront investment in software development

Support

Our comprehensive customer care package serves hoteliers and their guests 24/7/365

- Convenient call-in centers staffed by trained representatives who know our products and who are VSi employees — no sub-contractors and no temporary workers
- Periodic upgrade of installed software as appropriate
